AGENDA

- Where are we?
- AngularJS
- Let's build something
- Future of this group

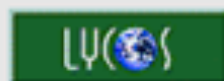

SOME BACKGROUND

Our communities are home to the most popular collection of **FREE HOME PAGES & E-MAIL** on the web. Please join or visit one of our 29 neighborhoods today.

GEOCITIES

YOUR HOME ON THE WEB

Static HTML

Dynamic HTML

HTML + CSS + JavaScript

Dynamic web pages

Server rendered the HTML pages

Ajax: Asynchronous JavaScript XML

DOM manipulation

Model View ViewModel (MVVM)

The Single-Page App

WHAT IS ANGULARJS

HTML enhanced for web apps!

AngularJS is NOT

- **Library**
- **Does not abstract away HTML, CSS or JS**

AngularJS is

- **JavaScript Framework**
- **Extends HTML into more readable format**
- **Reduces DOM manipulation**
- **Allows easier testing**

DIRECTIVES & DATA BINDING

DIRECTIVES

AngularJS lets you extend HTML vocabulary for your application.

```
<html ng-app>
<head>
  <script src="../../lib/angular/angular.js"></script>
</head>
<body>

  <div ng-init="userName='Alice';">

    <H2> <span ng-bind="userName"></span> select pizzas to buy</H2>

    <input type="text" ng-model="userName">
```

ng-app
bootstraps angular

ng-init directive

ng-model directive

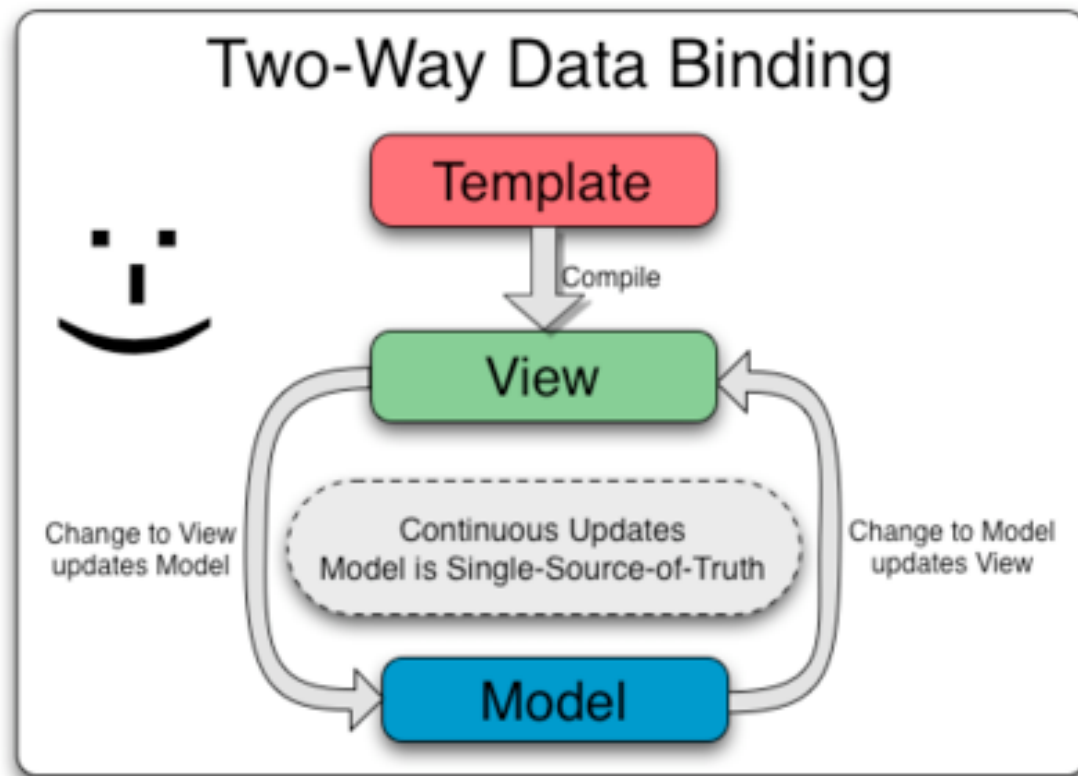

LET'S START CODING SOMETHING

DIRECTIVES & DATA BINDING

DATA BINDING

Synchronization of data between the model and view components

GET REAL!
EXAMPLE APP

PIZZERIA ...

SERVICE

\$HTTP

VIEWS, CONTROLLERS & SCOPE

Business logic needed for each single view

VIEW

```
<body ng-app="pizzaRestaurantApp">  
<div class="col-lg-12" ng-controller="pizzaListController">  
  <H2>{{userName}} select pizzas to buy</H2>  
</div>  
</body>
```

Define module

Define controller

CONTROLLER

```
angular.module('pizzaRestaurantApp', [])  
  .controller('pizzaListController', function ($scope) {  
    $scope.userName = 'Alice';  
  });
```

\$scope the glue between
application controller and view

SERVICE \$HTTP

Core Angular service connects to remote HTTP servers

Inject \$http

```
angular.module('pizzaRestaurantApp', [])  
  .controller('pizzaListController', function ($scope, $http) {  
  
    $http({method: 'GET', url: 'pizzas.json'}).  
      success(function(data) {  
        $scope.pizzaList = data;  
      });  
  });
```

Use it to get data!

SHOP EXAMPLE

VIEWS, CONTROLLERS & SCOPE

FILTERS

Filters format the value of an expression for display.

```
<h4>Filter</h4>
<input type="text" ng-model="searchFilter.$">

<h4>Order by</h4>
<select class="form-control" ng-model="orderOption">
  <option value="name">Alphabetically</option>
  <option value="price">Lowest price</option>
</select>

<UL ng-repeat="pizza in pizzaList | filter: searchFilter | orderBy: orderOption" >
  <LI>{{pizza.name | uppercase}}</LI>
</UL>
```

data

filter with argument

filter without argument

many filters to
expression

SHOP EXAMPLE FILTERS

SERVICES

Services are used to communicate controllers

Register service

```
angular.module('pizzaRestaurantApp', [])  
  .factory('shopCartService', function(){  
  
    var factoryInstance = {};  
  
    var pizzaListCart = [];  
  
    factoryInstance.addPizzaToCart = function(pizza) {  
    };  
    factoryInstance.getCart = function(){  
    };  
  
    return factoryInstance;  
  })  
  .controller('pizzaListController', function ($scope, $http, shopCartService) {  
  }).  
  controller('shopCartController', function($scope, shopCartService){  
  });
```

Define functions

Return instance

Inject in controllers

SHOP EXAMPLE SERVICES

FUTURE TOPICS

- **Routing**
- **Support framework: yeoman, grunt, bower**
- **Testing: Unit testing vs. e2e testing. Karma, Yasmine**
- **Talking to server**
- **Security: authentication and authorization**
- **Angular services**
- **Building Forms**
- **i18n and l10n**
- **Animations**
- **Directives**
- **Building phone apps with AngularJS**
